### **DETAILED ACTION**

1. This Office Action is in response to the amendment filed June 7, 2007 in application 10/619,816.
2. Claims 1, 6, 11, 16, 22 and 27 are presented for examination. Claims 1, 6, 11, 16, 22 and 27 are amended and claims 2-5, 7-10, 12-15, 17-21, 23-26 and 28-36 are cancelled.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 11 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claimed invention is inaccurate or incomplete to define a system/apparatus. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1, 11 and 22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In regards to claims 1, 11 and 22 a module claimed as software per se, i.e., the descriptions or expressions of the software are not physical "things." They are neither computer

Art Unit: 2114

components nor statutory processes, as they are not “acts” being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer, which permit the computer program’s functionality to be realized (*refer to applicant specification paragraph 0040*).

Therefore, the specified claims do not fall within the four statutory subject matters. See MPEP § 2106.

### ***Allowable Subject Matter***

5. Claims 6, 16 and 27 are allowed.

The following is an examiner’s statement of reasons for the allowance: Examiner deem claims 6, 16 and 27 as novel when read as a whole for the limitations of a apparatus for managing errors in prefetched data, the apparatus comprising: a validation module configured to correct single bit errors in the prefetched data packet, determine that the prefetched data packet contains an uncorrectable error, and store a first location address for the prefetched data packet with the uncorrectable error, wherein the address is stored in the second location and no address is stored for prefetched data packets without uncorrectable errors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
